

## Improving Neighborhood Walkability

In accordance with the DDOT Sidewalk Installation Policy, based on D.C. Law 14-137; D.C. Official Code 50.921.01, sidewalks are required on at least one side of every street within the District. This map identifies the specific streets within the Rock Creek East 1 Livability Study area that do not have any sidewalks.

We will use this data in conjunction with other information such as crash history, pedestrian volume counts, community input, and sidewalk conditions evaluations, to identify locations where sidewalk improvements should be prioritized.
