

# STUDY GOALS AND OBJECTIVES

## What is the Goal?

The overarching goal of the Rock Creek East I Livability Study is to identify opportunities for safer travel in the study area, and to improve the transportation network, regardless of how you get around.

## Objectives

- ✔ Develop a neighborhood-wide comprehensive approach for the implementation of traffic calming and operational improvements if warranted.
- ✔ Identify specific issues that impact safety and comfort of pedestrians, bicyclists, transit riders, motorists, and freight deliveries.
- ✔ Design cost-effective and measurable system improvements that benefit all users.
- ✔ Reduce vehicle speeds where problems have been measured or observed.
- ✔ Identify and evaluate safety and access issues and solutions around public facilities such as: schools, parks, recreational centers, and other key community facilities.
- ✔ Create design solutions that will enhance comfort and livability for residents and visitors to the project area.
